November 5th, 2013

The Town of Truro is excited to announce that three of our Town vehicles will be converted from unleaded gasoline to propane, in participation with Wilson's Fuels.

Mayor Bill Mills and Wilson's General Manager Gary Highfield

Propane is a safe, affordable, lower emissions and cleaner-burning option for operating vehicles and the Town of Truro believes this move will be a great alternative and initiative. The vehicles being converted will run on propane, however, should it be needed, gasoline is available with the simple flip of a switch.

Truro Mayor Bill Mills says "This initiative is part of our sustainability plan and should this endeavor prove to be successful, we can then look at converting more of our vehicles. I think it's great to have this option for cleaner running vehicles".
