Water Break on Willow Street

Truro – A 12” water main broke early this morning on Willow Street, as a result of that the Pleasant Street tank was drained.

The water will be off on Willow Street between Glenwood and Upham most of the day for the repair. The Pleasant Street tank will take 2-3 hours to refill and pressurize the system. Until that time the water to residents in the areas fed by the tank will have low water pressure and dirty water.

If anyone has questions or concerns further to this they can contact the Engineering department 902-895-4243.

Outside office hours, the contact information would be the Truro Police Dispatch (902-895-5351).
